Application

Disinfection of instruments

- Scissors and combs
- Razors
- Manicure instruments

Disinfection Cylinders available in 3 sizes:

- Salon Cylinder – 1.400 ml
- Midsize Cylinder – 850 ml
- Manicure Cylinder – 220 ml

Disinfection of smooth, non-porous instruments and surfaces

Disinfection of clippers, trimmers and scissors blades

- Disinfects
- Cleans
- Lubricates
- Cools
- Anti rust protection

Removes hair spray and styling product residue from salon chairs, mirrors, workstations and salon appliances (flat irons, curling irons, hair dryers). Cleans all surfaces including stainless steel, chrome, glass, vinyl and plastic.

- Vegan

Removes hair spray, styling products and soil from the salon floor

- Highly concentrated

Dissolves hair, shampoo, conditioner and hair color residue without damaging the pipes

- Highly concentrated
- Chlorine free
- Works instantly
- Vegan

Removes hair color stains from the skin

- Contains soothing Aloe Vera
- Very effective at removing dark hair color, without harsh rubbing

How to Use

Mixing ratio 1:20 = 5%

- 60 ml in 1200 ml water
- 40 ml in 800 ml water
- 7 ml in 150 ml water

Optimal Contact Time:

For effective disinfection, instruments must be immersed in NOVICIDE solution for minimum of 15 minutes. The solution must be changed at least 2 times per week or immediately when the solution is contaminated and cloudy with blood, hair or skin. Rinse with water and dry before using instruments.

- Alcohol Free

Spray surface and keep moist for 3 minutes, wipe clean.

- Alcohol Free

Spray only on clipper or scissors blades.

Surface must remain moist for 3 minutes, wipe off excess oil.

The spray blows hair, dust and residue from between the teeth of the blade.

When used regularly, it increases the life of the clipper and delivers a sharp cutting action.

NOVICIDE Blade Care should be used after EVERY customer to stop the transmission of infection.

Spray on surfaces and wipe clean.

- To clean combs, brushes and rollers, submerge in Spriquil, for 10 minutes, rinse with water.

- For salon appliances, unplug, let cool, spray surface and wipe clean.

One capful Sparkle in 10 liters of water

- Not recommended for marble of granite floors

To prevent clogs, use 100 ml in each salon basin one time per week, wait 10 minutes and rinse with warm water.

When the drain is clogged: use 200ml Drain Blitz, wait 10 minutes and rinse with warm water.

Lightly wipe a SEYFNSTEIN Hair Color Remover pad over the skin to remove unwanted color. Or: SEYFNSTEIN Fluid on a cotton pad to remove hair color from the skin.

- Alcohol Free

Hygiene Plan

What?	When?	How?	With What?
Disinfection of scissors, combs, razors and instruments	After every customer	15 minute immersion in Novicide solution	NOVICIDE Concentrate mixed with water
Disinfection of clipper blades and scissors	After every customer	Spray blade only, 3 minute moist contact time, wipe clean	NOVICIDE Blade Care Spray
